The study of family violence is surrounded by multiple controversies. Experts in this field do not agree about what should be studied and condemned (Is spanking violence? Is women's violence toward men a major social problem? If it is, how should it be measured? What, specifically, should be condemned as date rape?) Experts also disagree about the causes of violence (Individual pathology? The structure of gender or families?), as well as about what should be done to eliminate it (Do child sexual abuse education programs or family preservation programs work?). Now in its Second Edition, *Current Controversies on Family Violence* contains thoughtful--often heated--discussions that highlight the most current controversies, research, and policy directions in the family violence issue. This volume includes chapters by academic and public policy researchers, therapists, lawyers, victim advocates and educators. Some of the controversies in the first edition have been deleted while new ones have been added. Chapters in this Second Edition also are shorter and more accessible to readers who are not already experts in family violence. This is an excellent and necessary resource for students and researchers of interpersonal violence, sociology, social work, nursing, gender studies, clinical psychology, criminal justice, and gerontology.
