Fundamentals of Traditional Chinese

## Medicine

This book systematically describes the fundamental theories of Traditional Chinese Medicine (TCM).

It outlines the basic concepts and theories of TCM, such as yin-yang, the five elements, qi(vital energy), blood and body fluids, pathogenesis, pathology, the four diagnostic techniques, the eight guiding principles, differentiation of syndromes and general rules of prevention and treatment.

Shuai Xuezhong, the author and translator of the book, is an associate professor and director of the English-TCM Teaching and Research Section at the Hunan College of Traditional Chinese Medicine.

作者介绍:

## 目录: CONTENTS

### 1. GENERAL INTRODUCTION

1-1 Formation and development of the theoretical system of TCM

1-2 The materialistic and dialectical outlook in the theoretical system of TCM

1-2-1 The materialistic outlook

1-2-1-1 The human body is formed by qi between heaven and earth

1-2-1-2 Mutual dependence of xing (body) and shen (spirit)

1-2-1-3 The prevention and treatment of disease

1-2-2 The dialectical outlook

1-3 Chief features of TCM

1-3-1 The holistic concept

1-3-1-1 The body is an integral whole

- 1-3-1-2 The unity of man and nature
- 1-3-2 Bianzheng and lunzhi (planning treatment according to diagnosis)
- 2. YIN AND YANG, FIVE ELEMENTS (PHASES)
- 2-1 The yin-yang theory
  - 2-1-1 Chief contents of the yin-yang theory
    - 2-1-1-1 Opposition and restraint of yin and yang
    - 2-1-1-2 Interdependence of yin and yang
    - 2-1-1-3 Kinetic equilibrium between yin and yang
    - 2-1-1-4 Intertransformation of yin and yang
  - 2-1-2 Application of the yin-yang theory
    - 2-1-2-1 Tissues and structures of the body
    - 2-1-2-2 Physiological functions of the body
    - 2-1-2-3 Pathological processes of the body
    - 2-1-2-4 Diagnosis
    - 2-1-2-5 Treatment
- 2-2 The five-element theory
  - 2-2-1 Chief contents of the five-element theory
    - 2-2-1-1 Characteristics of the five elements
    - 2-2-1-2 Classification according to the five elements
    - 2-2-1-3 The interrelationship of the five elements
  - 2-2-2 Application of the five-element theory in TCM
    - 2-2-2-1 The physiological functions of the five yin viscera and their relation
    - 2-2-2-2 The influence of pathological changes of the five yin viscera
    - 2-2-2-3 Application of the five-element theory in diagnosis and treatment
- 3. VISCERAL SYMPTOMS
- 3-1 The five yin viscera
  - 3-1-1 The heart
    - 3-1-1-1 Main physiological functions of the heart
    - 3-1-1-2 Relation of the heart to the emotions, body fluids, tissues and sense organs
  - Appendix: Pericardium
  - 3-1-2 The lung
    - 3-1-2-1 Main physiological functions of the lung
    - 3-1-2-2 Relation of the lung to the emotions, body fluids, tissues and sense organs
  - 3-1-3 The spleen
    - 3-1-3-1 Chief physiological functions of the spleen
    - 3-1-3-2 Relation of the spleen to the emotions, body fluids, tissues and sense organs
  - 3-1-4 The liver
    - 3-1-4-1 Chief physiological functions of the liver
    - 3-1-4-2 Relation of the liver to the emotions, body fluids, tissues and sense organs
  - 3-1-5 The kidney
    - 3-1-5-1 Chief physiological functions of the kidney
    - 3-1-5-2 Relation of the kidney to the emotions, body fluids, tissues and sense organs
  - Appendix: Mingmen (the vital portal)
- 3-2 The six yang viscera
  - 3-2-1 The gallbladder
  - 3-2-2 The stomach
    - 3-2-2-1 Digestion
    - 3-2-2-2 The stomach is concerned with communication and descendance and its qi is normal when it descends
  - 3-2-3 The small intestine
    - 3-2-3-1 The small intestine is concerned with reception and digestion of food
    - 3-2-3-2 The function of the small intestine is to differentiate the purified (nutrients) from the turbid (waste)
  - 3-2-4 The large intestine

- 3-2-5 The bladder
- 3-2-6 The triple energizer
  - 3-2-6-1 Governing qi
  - 3-2-6-2 The passage through which body fluids pass
  - 3-2-6-3 Location of the upper, middle and lower energizers and their physiological characteristics
- 3-3 Unusual organs
  - 3-3-1 The brain
  - 3-3-2 The uterus
- 3-4 Relation between yin and yang viscera
  - 3-4-1 Relation among the five yin viscera
    - 3-4-1-1 Relation between the heart and lung
    - 3-4-1-2 Relation between the heart and spleen
    - 3-4-1-3 Relation between the heart and liver
    - 3-4-1-4 Relation between the heart and kidney
    - 3-4-1-5 Relation between the lung and spleen
    - 3-4-1-6 Relation between the lung and liver
    - 3-4-1-7 Relation between the lung and kidney
    - 3-4-1-8 Relation between the liver and spleen
    - 3-4-1-9 Relation between the liver and kidney
    - 3-4-1-10 Relation between the spleen and kidney
  - 3-4-2 Relation of the six yang viscera
  - 3-4-3 Relation between the five yin and six yang viscera
    - 3-4-3-1 Relation between the heart and small intestine
    - 3-4-3-2 Relation between the lung and large intestine
    - 3-4-3-3 Relation between the spleen and stomach
    - 3-4-3-4 Relation between the liver and gallbladder
    - 3-4-3-5 Relation between the kidney and bladder
- 4. QI (VITAL ENERGY), XUE (BLOOD) AND JIN-YE (BODY FLUIDS)
  - 4-1 Qi (vital energy)
    - 4-1-1 Basic concept
    - 4-1-2 Formation
    - 4-1-3 Physiological functions
      - 4-1-3-1 The promoting action
      - 4-1-3-2 The warming action
      - 4-1-3-3 The protecting action
      - 4-1-3-4 The controlling action
    - 4-1-3-5 Activities of qi
    - 4-1-4 Movement of qi
    - 4-1-5 Distribution and classification of qi
      - 4-1-5-1 Primordial qi
      - 4-1-5-2 Chest qi
      - 4-1-5-3 Nutritional qi
      - 4-1-5-4 Defensive qi
  - 4-2 Blood
    - 4-2-1 Basic concept
    - 4-2-2 Formation
    - 4-2-3 Function
    - 4-2-4 Circulation
  - 4-3 Body fluids
    - 4-3-1 Basic concept
    - 4-3-2 Formation, distribution and excretion
    - 4-3-3 Function
  - 4-4 Interrelation of qi, blood and body fluids

4-4-1 Relation between qi and blood

4-4-1-1 Qi can generate blood

4-4-1-2 Qi can promote blood circulation

4-4-1-3 Blood as the carrier of qi

4-4-2 Relation between qi and body fluids

4-4-2-1 Qi can generate body fluids

4-4-2-2 Qi can transform body fluids

4-4-2-3 Qi controls body fluids and body fluids in turn carry qi

4-4-3 Relation between blood and body fluids

5. MERIDIANS AND THEIR COLLATERALS

5-1 The concept of the meridian and the formation of its system

5-1-1 Concept of the meridian system

5-1-2 Formation of the meridian system

5-2 Twelve regular meridians

5-2-1 Names

5-2-2 Direction, connection, distribution, relation and sequence

5-2-2-1 Direction and connection

5-2-2-2 Distribution

5-2-2-3 Relationship between the meridians

5-2-2-4 Sequence of flow of qi and blood in the meridian

5-2-3 Course

5-2-3-1 Lung Meridian of Hand-taiyin (L)

5-2-3-2 Large Intestine Meridian of Hand-yangming (LI)

5-2-3-3 Stomach meridian of foot-yangming (S)

5-2-3-4 Spleen Meridian of Foot-taiyin (Sp)

5-2-3-5 Heart Meridian of Hand-shaoyin (H)

5-2-3-6 Small Intestine Meridian of Hand-taiyang (SI)

5-2-3-7 Bladder Meridian of Foot-taiyang (B)

5-2-3-8 Kidney Meridian of Foot-shaoyin (K)

5-2-3-9 Pericardium Meridian of Hand-jueyin (P)

5-2-3-10 Triple Energizer Meridian of Hand-shaoyang (TE)

5-2-3-11 Gallbladder Meridian of Foot-shaoyang (G)

5-2-3-12 Liver Meridian of Foot-jueyin (Liv)

5-3 Eight extra meridians

5-3-1 Governor Vessel Meridian (GV)

5-3-1-1 The course

5-3-1-2 Main function

5-3-2 Conception Vessel Meridian (CV)

5-3-2-1 The course

5-3-2-2 Main function

5-3-3 Strategic Vessel Meridian

5-3-3-1 The course

5-3-3-2 Main function

5-3-4 Girdle Vessel Meridian

5-3-4-1 The course

5-3-4-2 Main function

5-3-5 Mobility Vessel Meridians of Yin and Yang

5-3-5-1 The course

5-3-5-2 Main function

5-3-6 Regulating Vessel Meridians of Yin and Yang

5-3-6-1 The course

5-3-6-2 Main function

5-4 Branches of the twelve meridians, large collateral meridians, musculofascia (or musculotendinous) meridians and cutaneous areas of meridians

- 5-4-1 Branches of the twelve meridians
  - 5-4-1-1 Physiological function
  - 5-4-1-2 The course
- 5-4-2 Large collateral meridians
  - 5-4-2-1 Physiological function
  - 5-4-2-2 Locations
- 5-4-3 Musculofascia (or musculotendinous) meridians
  - 5-4-3-1 Physiological function
  - 5-4-3-2 Distribution
- 5-4-4 Cutaneous areas of meridian
- 5-5 Physiology of meridians and application of the meridian theory
  - 5-5-1 Physiological functions
    - 5-5-1-1 Communicating the exterior of the body with the interior, the upper with the lower and connecting with the viscera and organs
    - 5-5-1-2 Promoting qi and blood circulation and nourishing the viscera and tissues
    - 5-5-1-3 The inducing and conducting actions
    - 5-5-1-4 Regulating the balance
  - 5-5-2 Application of the meridian theory
    - 5-5-2-1 Pathological process
    - 5-5-2-2 Guiding diagnosis and treatment
- 6.THE CAUSE OF DISEASE
  - 6-1 The cause of disease
    - 6-1-1 The six excesses
      - 6-1-1-1 Wind occurs chiefly in spring but may appear in every season
      - 6-1-1-2 Cold
      - 6-1-1-3 Summer-heat
      - 6-1-1-4 Damp
      - 6-1-1-5 Dryness
      - 6-1-1-6 Fire (intense heat)
    - 6-1-2 Pestilential factors
    - 6-1-3 Internal injuries by the seven emotions
      - 6-1-3-1 Relation between the seven emotions and qi and blood in the viscera
      - 6-1-3-2 Characteristics of the seven emotions and disease mechanism
    - 6-1-4 Improper diet, fatigue and lack of physical exercise
      - 6-1-4-1 Improper diet
      - 6-1-4-2 Fatigue and lack of physical exercise
    - 6-1-5 External injuries
    - 6-1-6 Tan-yin (phlegm and excess exudates) and congealed blood
      - 6-1-6-1 Tan-yin
      - 6-1-6-2 Congealed blood
  - 6-2 Principles of occurrence and change of disease
    - 6-2-1 Anti-pathogenic and pathogenic factors and the onset of disease
      - 6-2-1-1 Deficient anti-pathogenic factor as a cause of disease
      - 6-2-1-2 The pathogenic factor
      - 6-2-1-3 The anti-pathogenic factor
    - 6-2-2 The environment and invasion of disease
      - 6-2-2-1 The external environment and invasion of disease
      - 6-2-2-2 The internal environment and invasion of disease
- 7. PATHOGENESIS
  - 7-1 Flourishing and decline of anti-pathogenic and pathogenic factors
    - 7-1-1 Flourishing and decline of anti-pathogenic and pathogenic factors and their deficiency and excess
    - 7-1-2 Flourishing and decline of pathogenic and anti-pathogenic factors and transformation of disease

- 7-1-2-1 Anti-pathogenic factor conquering pathogenic factor
- 7-1-2-2 Pathogenic factor conquering anti-pathogenic factor
- 7-2 Disharmony between yin and yang
  - 7-2-1 Relative flourishing of yin or yang
    - 7-2-1-1 The absolute excess of yang
    - 7-2-1-2 The absolute excess of yin
  - 7-2-2 The absolute decline of yin or yang
    - 7-2-2-1 The absolute decline of yang
    - 7-2-2-2 The absolute decline of yin
  - 7-2-3 Interrelationship of yin and yang
    - 7-2-3-1 Deficient yin affecting yang
    - 7-2-3-2 Deficient yang affecting yin
  - 7-2-4 Disharmony of yin and yang
    - 7-2-4-1 Excess yin hindering yang
    - 7-2-4-2 Excess yang hindering yin
  - 7-2-5 Depletion of yin and yang
    - 7-2-5-1 Depletion of yang
    - 7-2-5-2 Depletion of yin
- 7-3 Abnormality of qi and blood
  - 7-3-1 Abnormal qi
    - 7-3-1-1 Deficient qi
    - 7-3-1-2 Abnormal movement of qi
  - 7-3-2 Abnormal blood
    - 7-3-2-1 Blood deficiency
    - 7-3-2-2 Congealed blood
    - 7-3-2-3 Blood heat
  - 7-3-3 Dysfunction of the relationship between qi and blood
    - 7-3-3-1 Stagnant qi and blood
    - 7-3-3-2 Inability of qi to control blood
    - 7-3-3-3 Exhaustion of qi associated with severe hemorrhage
    - 7-3-3-4 Deficient qi and blood
    - 7-3-3-5 Hypofunction of qi and blood in nourishing meridians
- 7-4 Abnormal body fluid metabolism
  - 7-4-1 Insufficiency of body fluids
  - 7-4-2 Distribution, excretion and obstruction of body fluids
  - 7-4-3 Disharmony between body fluids, qi and blood
    - 7-4-3-1 Relation of body fluids and obstruction of qi
    - 7-4-3-2 Exhaustion of qi associated with body fluids
    - 7-4-3-3 Exhaustion of body fluids and dryness of blood
    - 7-4-3-4 Consumed body fluids and congealed blood
- 7-5 "Five endogenous pathogens"
  - 7-5-1 Wind qi moving internally
    - 7-5-1-1 Transformation of liver yang into wind
    - 7-5-1-2 Wind symptom produced by extreme heat
    - 7-5-1-3 Wind symptom produced by deficient yin
    - 7-5-1-4 Wind symptom produced by deficient blood
  - 7-5-2 Internal cold
  - 7-5-3 Internal dampness (also called endogenous damp)
  - 7-5-4 Dryness caused by consumed body fluids
  - 7-5-5 Internal fire
- 7-6 Pathogenesis of meridians
  - 7-6-1 Relative excess and deficient qi and blood in the meridians
  - 7-6-2 Adverse qi and blood in the meridians
  - 7-6-3 Obstruction of qi and blood circulation in the meridians

- 7-6-4 Failure of qi and blood in the meridians
- 7-7 Pathogenesis of zang-fu (viscera)
  - 7-7-1 Disharmony between yin and yang, qi and blood of the five yin viscera
    - 7-7-1-1 Disharmony between yin and yang, qi and blood of the heart
    - 7-7-1-2 Disharmony between yin and yang, qi and blood of the lung
    - 7-7-1-3 Disharmony between yin and yang, qi and blood of the spleen
    - 7-7-1-4 Disharmony between yin and yang, qi and blood of the liver
    - 7-7-1-5 Disharmony between yin and yang, qi and blood of the kidney
  - 7-7-2 Disorder of the six yang viscera
    - 7-7-2-1 Disorder of the gallbladder
    - 7-7-2-2 Disorder of the stomach
    - 7-7-2-3 Disorder of the small intestine
    - 7-7-2-4 Disorder of the large intestine
    - 7-7-2-5 Disorder of the urinary bladder
    - 7-7-2-6 Hypofunction of the triple energizer qi
  - 7-7-3 Dysfunction of the unusual organs
    - 7-7-3-1 Dysfunction of the brain
    - 7-7-3-2 Dysfunction of marrow and bone
    - 7-7-3-3 Dysfunction of blood vessels
    - 7-7-3-4 Dysfunction of the uterus
- 8. FOUR TECHNIQUES OF DIAGNOSIS
  - 8-1 Inspection
    - 8-1-1 Examination of the body
      - 8-1-1-1 Inspection of shen (Spirit)
      - 8-1-1-2 Inspection of complexion
      - 8-1-1-3 Examination of the body stature
      - 8-1-1-4 Inspection of body stature and movement
    - 8-1-2 Inspection of the local body
      - 8-1-2-1 Evaluation of the head and hair
      - 8-1-2-2 Inspection of the eye
      - 8-1-2-3 Inspection of the ear
      - 8-1-2-4 Inspection of the nose
      - 8-1-2-5 Inspection of the lips, teeth and throat
      - 8-1-2-6 Inspection of the skin
    - 8-1-3 Inspection of the tongue
      - 8-1-3-1 Relation between the tongue and viscera
      - 8-1-3-2 Tongue diagnosis
      - 8-1-3-3 Relation between the tongue proper and its coating
      - 8-1-3-4 Clinical significance of tongue diagnosis
      - 8-1-3-5 Notes on tongue diagnosis
    - 8-1-4 Observation of excreta
      - 8-1-4-1 Sputum and saliva
      - 8-1-4-2 Vomit
      - 8-1-4-3 Stools
      - 8-1-4-4 Urine
    - 8-1-5 Observation of the veinules of the infant's index finger
      - 8-1-5-1 Techniques for observing the finger's veinules
      - 8-1-5-2 Observing the small superficial veinules of the finger
  - 8-2 Auscultation-olfaction
    - 8-2-1 Auscultation
      - 8-2-1-1 Speech
      - 8-2-1-2 Respiration
      - 8-2-1-3 Cough
      - 8-2-1-4 Hiccup and eructation

- 8-2-2 Olfaction
- 8-3 Inquiry
  - 8-3-1 Inquiry into the patient's general condition
  - 8-3-2 Inquiry into the patient's past history and lifestyle
  - 8-3-3 Inquiry into the patient's family and medical history
  - 8-3-4 Inquiry into the disease process
  - 8-3-5 Inquiry into present symptoms
    - 8-3-5-1 Chills and fever
    - 8-3-5-2 Sweating
    - 8-3-5-3 Inquiry into pain
    - 8-3-5-4 Sleep
    - 8-3-5-5 Diet and appetite
    - 8-3-5-6 Stools and urine
    - 8-3-5-7 Menstrual flow and vaginal discharge
    - 8-3-5-8 Children
- 8-4 Palpation
  - 8-4-1 Taking the patient's pulse
    - 8-4-1-1 The principle of the formation of pulse indications and clinical significance of taking pulse
    - 8-4-1-2 Location of palpation and pulse
    - 8-4-1-3 Ways of taking pulse
    - 8-4-1-4 Normal pulse indications
    - 8-4-1-5 Abnormal pulse and its indications
    - 8-4-1-6 Compound pulse and its indications
    - 8-4-1-7 Diagnosis in accordance with pulse and symptoms
  - 8-4-2 Palpation of certain areas of the body
    - 8-4-2-1 Method and significance
    - 8-4-2-2 Contents
- 11-2-2 Reinforcing the anti-pathogenic factor and eliminating the pathogenic factor
  - 11-2-2-1 Reinforcing the anti-pathogenic factor and eliminating the pathogenic factor
  - 11-2-2-2 The principle of reinforcing the anti-pathogenic factor and eliminating the pathogenic factor
- 11-2-3 Regulating yin and yang
  - 11-2-3-1 Reducing a relative excess
  - 11-2-3-2 Reinforcing a relative decline
- 11-2-4 Regulating the function of the viscera
- 11-2-5 Regulating the relation between qi and blood
- 11-2-6 Treatment of a disease according to season, environment and individual constitution
  - 11-2-6-1 Treatment of a disease according to the season
  - 11-2-6-2 Treatment of a disease according to the geographical environment
  - 11-2-6-3 Treatment of a disease according to the individual
- 11-2-7 Application of the general rules of treatment
  - 11-2-7-1 Application of the eight principal therapies
  - 11-2-7-2 Application of the eight principal therapies in coordination
