From the Netherlands to the Ottoman Empire, to Japan and India, this groundbreaking volume confronts the complex and diverse problem of the formation of fiscal states in Eurasia between 1500 and 1914. This series of country case studies from leading economic historians reveals that distinctive features of the fiscal state appeared across the region at different moments in time as a result of multiple independent but often interacting stimuli such as internal competition over resources, European expansion, international trade, globalisation and war. The essays offer a comparative framework for re-examining the causes of economic development across this period and show, for instance, the central role that the more effective fiscal systems of Europe during the seventeenth and eighteenth centuries played in the divergence of east and west as well as the very different paths to modernisation taken across the world.

非常优秀的近代欧亚财政史论文集，由各国经济史家负责撰写一章，集中回应了诺斯式经济增长和熊彼特式财政国家带来的启发及其缺陷。Wong的一章主要综合了国内近年来财政史研究成果，并结合自身对仓储制的研究，提出清代国家财政制度背后「善治」的观念，试图赋予政治经济学以道德的纬度，但是具体讨论较为流于表面。
