出版时间:2012-1-28

装帧:Paperback

isbn:9780321832078

This is the updated and corrected edition of The iOS 5 Developer's Cookbook.
The iOS 5 Developer's Cookbook, Third Edition Covers iOS 5, Xcode 4.2, Objective-C 2.0's ARC, LLVM, and more! In this book, bestselling author and iOS development guru Erica Sadun brings together all the information you need to quickly start building

successful iOS apps for iPhone, iPad, and iPod touch. Sadun has thoroughly revised this book to focus on powerful new iOS 5 features, the latest version of Objective-C, and the Xcode 4 development tools. The iOS 5 Developer's Cookbook, Third Edition is packed with ready-made code solutions for the iOS 5 development challenges you're most likely to face, eliminating trial-and-error and helping you build reliable apps from the very beginning. Sadun teaches each new concept and technique through robust code that is easy to reuse and extend. This isn't just cut-and-paste: Using her examples, Sadun fully explains both the "how" and "why" of effective iOS 5 development. Sadun's tested recipes address virtually every major area of iOS development, from user interface design to view controllers, gestures and touch, to networking and security. Every chapter groups related tasks together, so you can jump straight to your solution, without having to identify the right class or framework first. Coverage includes: *

- * Mastering the iOS 5 SDK, Objective-C essentials, and the iOS development lifecycle
- * Designing and customizing interfaces with Interface Builder and Objective-C
- * Organizing apps with view controllers, views, and animations featuring the latest Page View controllers and custom containers
- * Making the most of touch and gestures-including custom gesture recognizers
- * Building and using controls from the ground up
- * Working with Core Image and Core Text
- * Implementing fully featured Table View edits, reordering, and custom cells
- * Creating managed database stores; then adding, deleting, querying, and displaying data
- * Alerting users with dialogs, progress bars, local and push notifications, popovers, and pings
- * Requesting and using feedback
- * Connecting to networks and services, handling authentication, and managing downloads
- * Deploying apps to devices, testers, and the App Store
