All societies face a key question: how to empower governments to perform essential governmental functions while constraining the arbitrary exercise of power. This balance, always in flux, is particularly fluid in today's China. This insightful book examines the changing relationship between that state and its society, as demonstrated by numerous reform efforts at subnational levels, and explores the implications for China and the world.

Ann Florini, Hairong Lai, and Yeling Tan set their analysis in a comparative context, investigating how China's changing understanding of key governance tools and concepts compares with—and is influenced by—developments and debates elsewhere. *China Experiments* draws on several specific cases to show how local authorities have responded to the challenges posed by Beijing's rapid transformation. The book thus differs from others on Chinese governance that focus on the pronouncements of intellectuals, and it is unique in its detailed, empirically grounded analysis.

The introduction sets the context and raises key overarching questions. It addresses among other factors the wide variety of experiments underway by which authorities are trying to adapt local governance structures to new demands. Chapters 2–5 then explore the factors driving various specific governance reforms in China. Each chapter explains the importance of various types of reforms in terms of implications for governance, provides international and national context, and draws upon specific case studies. The final chapter suggests a series of criteria by which China's political trajectory can be assessed.

## 评论

蛮面面俱到的，对地方实验的空间性着墨不多，对于政改的未来，作者持开放的态度

挺失望的，一个布鲁金斯一个肯尼迪一个中央编译的，结果都在灌水。。。开篇说有人说中国上有人说中国下，我们这本书会分析一下哪种情况比较靠谱，结尾说，我们认为，中国可上也可下。。。不过bibiliography还挺有价值的

作为地方政治研究来说，写得不俗。  
在威权主义的体制下保持着经济高速发展的中国，在政策和现实操作之间有着各种各样的空间和缝隙，这些缝隙中的故事可以算作这本书的主要内容。在控制和自由之间，地方政府达到了一种微妙的平衡。政治也是一门艺术。
