- \* Good documents should have consistent look and feel
- \* Hundreds of working examples, showing input and output side by side

- \* Showing the most recent solutions for producing top-quality documents
- \* Learn how to save time on document preparation

LaTeX is a free, automated state-of-the-art typesetting system. This book teaches all the ins and outs of LaTeX which are needed to write an article, report, thesis, or book. The book teaches by example, giving many worked out examples showing input and output side by side. The book presents the most recent techniques for presenting data plots, complex graphics, and computer presentations, but does not require previous knowledge. However, it is also a reference for the more seasoned user, with pointers to modern techniques and packages. Recurring themes in the book are consistent and effective presentation, planning and development, controlling style and content, and maintenance.

# 评论

不是一般的入门书，但也不是抽象的高级教程，由浅入深，我很喜欢作者对概念的诠释
