The geeks are coming. And our world needs them. Whether we want to improve education or cut crime, to enhance public health or to generate clean energy, we need the experimental methods of science - the best tool humanity has yet developed for working out what works. Yet from the way we're governed to the news we're fed by the media we're let down by a lack of understanding and respect for its insights and evidence. In The Geek Manifesto Mark Henderson explains why and how we need to entrench scientific thinking more deeply into every aspect of our society. A new movement is gathering. Let's turn it into a force our leaders cannot ignore. Shortlisted for the Political Book Awards Polemic of the Year 2012.

## 评论

not bad by its own right. Maybe i am already a believer in the scientific methods, so this

book is not doing much for me tho.

作者热情有余能力一般，但是他说的这个趋势是对的。

道理是对的，但实现起来就没那么容易了，对于非Geek来说有点教育意义，但对于Geek来说没什么新意。
