'Geography and Geographers' surveys the major trends in human geography since 1945 in the English-speaking world and sets their appreciation within the context of economic, social and political changes. It focuses on the debates among geographers regarding what their discipline should study and how that should be done, and draws on a wide reading of the geographical literature produced during a fifty-year period characterised by both massive growth in the number of academic geographers and several very substantial shifts in conceptions of the discipline's scientific rationale.

作者介绍:

Ronald John Johnston, OBE, FAcSS, FBA (born 30 March 1941^[1] in Swindon,^[2] England) is a British human geographer, known for elaborating his discipline's foundations, particularly its history and nature, and for his contributions to urban social geography and electoral geography. His broad scope is illustrated by the fact that he makes extensive use of quantitative methods, while critically dealing with subjects of social and political relevance.^[2] Johnston also is an unusually productive

author: As of December 2009, he has authored or co-authored more than 50 books and 800 papers, and edited or co-edited a further more than 40 books (if translated and revised editions are counted separately).[3][4] Among the books he has edited is The Dictionary of Human Geography, the first four editions of which as main editor.

评论

备课用。对计量革命及之后的范式转移有很清晰的梳理，巨长的参考文献真是让人叹为观止。根据出版时间推测，中文版应该是据此版 (5th edition) 译出。该书的第七版已经于上个月出版，这二十年间的许多更新也被囊括了进去。

书评

感觉读思想史还是得有老师领着，需要哲学和社会学方面的基础阿。
这本书很难买到，我自己打印了一本翻着看。前面几章
应该没问题，后面的现象学、结构主义就有点犯难了，新版的加入了文化转向的东西更
让人觉得晕头转向。推荐一个老师的博客<http://blog.sina.com.cn/analy92>， ...
