装帧:Paperback

isbn:9781449327439

Learn how to build complete client-side applications with ClojureScript, the Clojure language variant that compiles to optimized JavaScript. This hands-on introduction

shows you how ClojureScript not only has similarities to JavaScript - without the flaws - but also supports the full semantics of its parent language. You'll delve into ClojureScript's immutable data structures, lazy sequences, first-class functions, macros, and support for JavaScript libraries. No previous experience with Clojure or ClojureScript is necessary. If you're familiar with JavaScript, HTML, CSS, and the DOM, you'll quickly discover that ClojureScript has the same reach as JavaScript, but with more power. Start writing ClojureScript code with the Leiningen build system Learn how the ClojureScript compiler works to produce optimized JavaScript Use JavaScript functions and libraries directly from ClojureScript code Explore functions in Clojure's sequence library such as map, reduce, and filter Use macros to define new control structures or embed domain-specific languages Compile manually or script your own workflow with ClojureScript's compiler tools Integrate ClojureScript with Clojure on the JVM to build powerful client-server applications

一天扫完，期待 Clojure + ClojureScript 一统前后端的那一天。据闻 ClojureScript 可以自举了：<https://news.ycombinator.com/item?id=9983204>。这样似乎可以解决过于依赖 Google Closure 的问题？

nodejs 一句都没扯，有点遗憾

工作的项目需要一个 DSL，看看能不能用 clojurescript 实现（因为目前技术栈都是 nodejs）看完：- 这本书一部分内容过时了，时时需要看官方文档 - 跟着过一遍内容，理解一下 clojurescript 的一些东西，还是有收获的，组织的比官方文档清晰 ----- 看完了：- up and running：书有些旧了，得参考 clojurescript 官网的说明 - 内容都比较浅，过一遍留个印象 - 缺乏 nodejs 相关的内容

cookbook.1小时看完，简单说就是和Clojure的子集，还挺好的
