Tectum's illustrated Bible series gets another welcome addition with this new volume fully dedicated to street art. Graffiti exists in all shapes and sizes - from stencil and sticker art to old-school spray painting. It appears on bridges, walls and pavements and nowadays in art galleries! This book contains no text but more than 450 amazing colour photographs demonstrating the astonishing skills of the international graffiti artists. These images speak for themselves - and that is exactly what they were meant to do.
