著者:Michael J. Crowe

出版者:Dover Publications Inc.

出版时间:2003-3-28

装帧:Paperback

isbn:9780486406756

This is the first detailed, scholarly study in English of the astronomical, philosophical, and religious ideas that developed between 1750 and 1900 regarding the existence of intelligent extraterrestrial life. The author examines the roles of prominent figures such as Kant, Herschel, Paine, and Lowell in the issue. 16 illustrations.

评论

Kepler觉得宇宙的结构是一套Russian doll of platonic solids...即便木星上有智慧生命，也注定不如人类的位置得天独厚，正因为他们离其他行星的距离无法构成platonic solids.. 这是什么诡异的论证。
