This book is intended as an introductory text for students studying a wide range of courses concerned with animal management, zoo biology and wildlife conservation, and should also be useful to zookeepers and other zoo professionals. It is divided into

three parts. Part 1 considers the function of zoos, their history, how zoos are managed, ethics, zoo legislation and wildlife conservation law. Part 2 discusses the design of zoos and zoo exhibits, animal nutrition, reproduction, animal behaviour (including enrichment and training), animal welfare, veterinary care, animal handling and transportation. Finally, Part 3 discusses captive breeding programmes, genetics, population biology, record keeping, and the educational role of zoos, including a consideration of visitor behaviour. It concludes with a discussion of the role of zoos in the conservation of species in the wild and in species reintroductions. This book takes an international perspective and includes a wide range of examples of the operation of zoos and breeding programmes particularly in the UK, Europe, North America and Australasia. 评论

本书叙述的是关于动物园的生物学，挺有趣的，内容也比较全，动物园的历史，动物园中动物的行为、喂养及管理，动物园的保育作用等等都有涉及。且附有详细的参考文献、相关网址和推荐书目。每一小节结束后还有练习。强烈推荐对动物园感兴趣的或是动物园相关工作或科研人员阅读。我把整本书粗读了一遍，跟这次要去动物园做的课题相关的那几章细读了一下以后觉得这次打算做的这个课题还是挺有意思的，虽然我本周六有事不能去，但希望另外一位能去的小伙伴能收集回来靠谱的数据，期待最后的统计结果了~
