In *Seizing the Means of Reproduction*, Michelle Murphy's initial focus on the alternative health practices developed by radical feminists in the United States during the 1970s and 1980s opens into a sophisticated analysis of the transnational entanglements of American empire, population control, neo-liberalism, and late-twentieth-century feminisms. Murphy concentrates on the techno-scientific means - the technologies, practices, protocols, and processes - developed by feminist health activists. She argues that by politicizing the technical details of reproductive health, alternative feminist practices aimed at empowering women were also integral to late-twentieth-century biopolitics. Murphy traces the transnational circulation of cheap, do-it-yourself health interventions, highlighting the uneasy links between economic logics, new forms of racialized governance, U.S. imperialism, family planning, and the rise of NGOs. In the twenty-first century, feminist health projects have followed complex and discomfoting itineraries. The practices and ideologies of alternative health projects have found their way into World Bank guidelines, state policies, and commodified research. While the particular moment of U.S. feminism in the shadow of Cold War and postcolonialism has passed, its dynamics continue to inform the ways that health is governed and politicized today.

评论

Murphy写作挺好的，也很能综合各类研究，但是…就真的没啥特别的洞见…生物医学化、检测技术使得疾病成为可见与可能、预防医学的扩展、女性主义的建制化…早就都被讲烂了。她自己的历史化生命政治讲的又是啥？
