This is the first volume of the series Oxford Studies in the History of Philosophy. Each volume of the series is organized around a particular theme, and is cross-disciplinary in its approach. In this collection of substantial new studies in Scottish Philosophy in the age of Hutcheson and Hume, close attention is given to the study of context and the use of original historical sources as a key to philosophical interpretation. The collection includes revolutionary research on Hume's early reading in science and religion and its impact on his philosophy.
