Birds of Passage presents an unorthodox analysis of migration from rural areas to urban industrial societies. It argues that such migrations are a continuing feature of industrial societies and that they are generated by forces inherent in the nature of industrial economies. It explains why conventional economic theory finds such migrations so difficult to comprehend, and challenges a set of older assumptions that supported the view that these migrations were beneficial to both sending and receiving societies. Professor Piore seriously questions whether migration actually relieves population pressure and rural unemployment, and whether it develops skills necessary for the emergence of an industrial labour force in the home country. Furthermore, he criticizes the notion that in the long run migrant labour complements native labour. On the basis of this critique, he develops an alternative theory of the nature of the migration process.

评论

一些观点很有趣，足够尖锐，但总体而言，缺乏详尽的理论分析，几乎没有80年代之后劳动经济学论文中大篇幅的对关键参数的估计和计量检验。1980年本书出版的时候，当前国际迁移经济学方面的大牛Borjas, Card这些人还没有成名呢，全面改变移民研究，尚有待时日。。。
