This text offers a user's guide to the philosophical work of Roy Bhaskar. The author expounds the main concepts of Bhaskar's work and defends his theory of knowledge. Part One deals with the philosophy of experimental science and discusses the stratification of nature, showing how biological structures are founded on chemical ones, yet are not reducible to them. Part Two discusses the human sciences, exploring Bhaskar's understanding of the human world and the ways in which it is studied in ethics, politics, economics, psychoanalysis and linguistics. His concept of an "explanatory critique" (an explanation that is also a criticism, not in addition to, but by virtue of, its explanatory work) is discussed at length as a key concept for ethics and politics. Collier concludes by looking at the uses to which critical realism has been put in clarifying disputes within the human sciences, with particular reference to linguistics, psychoanalysis, economics and politics.

導師寒假前推薦的。終於暑假前看完了。。至少達到我想看它的目的了，把我之前對巴斯卡一些沒有聯接地方，都串得清楚多了。但是，對照了我寒假看的PN筆記。還是覺

得有些地方被introduction撰寫性質，給略過了。
。最後確實提出一個不錯的問題。巴斯卡從scientific
practice給出的哲學，究竟和現象學式的從life world的，之間要怎麼聯接呢

应该是这本…读的第一本英文书，国政理论课
