A sociological analysis of prostitution as an occupation, this book studies the experiences of the madam of a small house and her career as a prostitute, from her entry into the profession as a teen-ager until her departure in her early for-ties. Of her twenty years in prostitu-tion, ten were spent as a house prostitute, and ten as a madam. Using in-depth interviews, the author investigates the madam's own interpretations of her life, including a term in prison and her revealing experiences after deciding to leave prostitution.
