What happens when you mix two colours? What do you get if you mix blue and yellow? This book looks at colour and what happens when you play with it. Just flip the acetate to reveal a new colour and a new picture! Young children love to mix colours together. PatrickGeorge have taken another popular concept and treated it in a new and exciting way. Following on from the success of 'Opposites', we have created 11 spreads of colours, with a single printed graphic on an acetate sheet between them. This is another book ideal for early learning which treats colour play in an innovative and quirky way. PatrickGeorge are all about graphic design made accessible to all ages - illustrations that are simple, witty, and fun. We want to encourage interactive reading between adult and child.
