Introduction: why don't electoral rules have the same effects in all countries?

1. When do the effects of electoral systems diverge from our expectations?
2. Mixed-member electoral systems: how they work and how they work for scholars
3. How democratic experience and party system development condition the effects of electoral rules on disproportionality and the number of parties: theory, measurement, and expectations
4. How democratic experience and party system development condition the effects of electoral rules on disproportionality and the number of parties: what we actually see
5. Political context, electoral rules, and their effects on strategic and personal voting
6. How democratic experience and party system development condition the effect of electoral rules on strategic defection
7. Social diversity, electoral rules, and the number of parties
8. How political context shapes the effect of electoral rules on women's representation
9. Conclusion: why and how political context matters for electoral system effects
