Book Description

The Magic School Bus was a series of children's books intended to teach scientific concepts to children. The books feature the exploits of Ms. Frizzle and her class of students at Walkerville Elementary School who board a magical school bus which takes them on educational adventures to space, under the Earth, into the human body, or to other such locations. The books were written in the first person from the point of view of an unnamed student in the Friz's class.

Synopsis:

Arnold has swallowed the Magic School Bus! Now, instead of seeing an exhibit of the human body at a museum, the class is taking a look at Arnold's stomach, his intestines, his bloodstream, and more from the inside on this heart-stopping fieldtrip - one the reluctant Arnold would be happy to miss.

From Publishers Weekly

Ms. Frizzle shepherds her reluctant students through the human body in a book that is as fancifully conceived as it is educational. Ages 6-9.

From School Library Journal

Grade 1-4-- Time to board the Magic School Bus again with that wild, wacky, and wonderful teacher, Ms. Frizzle. After she teaches her class about the human body and they visit the science museum, Mrs. Frizzle shrinks the bus and the class--except Arnold, who swallows them. This gives Cole and Degen the chance for two parallel stories, inside and outside of Arnold. With the bus inside, Cole explains digestion from the stomach into the small intestines. Then the bus enters a blood vessel where readers can see the plasma, red and white blood cells, and the flow into the heart. From there the class, now out of the bus and garbed in operating room smocks and masks, flows with the blood cells, now with fresh oxygen, to the brain. They climb down the bones of the spine, follow nerves to see muscles work, and then finally catch up with the bus to emerge in the nasal cavity. Meanwhile on part of each facing page, Arnold has coped with being lost and alone and has made it back to the school. With an enormous sneeze he sends the bus out to join him in the parking lot. The class can now chart the body from actual experience. Cole concludes with a true-false test with answers to help readers distinguish reality from fantasy. As readers of the previous "Magic School Bus" books (Scholastic) know, this is an enjoyable look at factual material painlessly packaged with the ribbons and balloons of jokes and asides meant to appeal to kids. Degen's zany, busy, full-color drawings fill the pages with action and information far beyond the text. Using a variety of visuals, including notes, close-ups, and diagrams along with a variety of realistic kids, he moves the parallel stories to their conclusions. Kids will love this book.

--Sylvia S. Marantz, Wellington School, Columbus, Ohio
