But as science commentator Margaret Wertheim argues in this "marvelously provocative" (Kirkus Reviews) book, cyberspace has in recent years become a repository for immense spiritual yearning. Wertheim explores the mapping of spiritual

desire onto digitized space and suggests that the modem today has become a metaphysical escape-hatch from a materialism that many people find increasingly dissatisfying. Cyberspace opens up a collective space beyond the laws of physics a space where mind rather than matter reigns. This strange refuge returns us to an almost medieval dualism between a physical space of body and an immaterial space of mind and psyche."
