As the author of the Word Court columns that appear in The Atlantic Monthly and in newspapers nationwide, Barbara Wallraff is one of America's most widely read writers on language. She is beloved for her wit and renowned for the depth of her knowledge. Now, in *Your Own Words*, Wallraff answers common and uncommon questions about English--and simultaneously explains how she does it. She reveals how you, too, can be a language expert. On one level, *Your Own Words* is about dictionaries, stylebooks, usage manuals, visual dictionaries, thesauri, writing guides, and the Internet: the strengths and weaknesses of these and other language-reference sources, where the sources disagree, and the ways in which even educated people misunderstand them. On a deeper level, however, *Your Own Words* is about how to make good form your own. While it evaluates the often contradictory advice that reference sources give, it encourages you to reach your own conclusions and develop a style that expresses you at your best. Illuminated throughout with anecdotes and selections from the Word Court columns, *Your Own Words* accomplishes what very few books on usage even attempt: it shows everyone with an interest in words--amateur, professional, student, or graduate--how to think about what goes into good style.
