The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse. The author, himself a former member of Greenpeace, is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence. Using the best available statistical information from internationally recognised research institutes, Bjorn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world. His arguments are presented in non-technical, accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves. Concluding that there are more reasons for optimism than pessimism, Bjorn Lomborg stresses the need for clear-headed prioritisation of resources to tackle real, not imagined problems. The Skeptical Environmentalist offers readers a non-partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media.

作者介绍:

Bjørn Lomborg (born January 6, 1965) is a Danish author, academic, and environmentalist. He is an adjunct professor at the Copenhagen Business School, director of the Copenhagen Consensus Centre and a former director of the Environmental Assessment Institute in Copenhagen. He became internationally-known for his best-selling and controversial book *The Skeptical Environmentalist*.

In 2002, Lomborg and the Environmental Assessment Institute founded the Copenhagen Consensus, which sought to establish priorities for advancing global welfare using methodologies based on the theory of welfare economics.

作者不是反对环保，而是强调说，我们需要 prioritize

"Wait, is this a real issue?"

我是挺赞同作者的观点的，他不是说不需要提倡环保，而且需要排序优先级，不要让恐惧主宰决策，而是要认清最重要的是什么再行动起来。
