著者:Poul Beckmann

出版者:Prestel Verlag

出版时间:October 2001

装帧:hardcover

isbn:9783791325286

Living Jewels presents Poul Beckmann's stunning close-up studio photographs of one of the most varied and beautiful species on the planet: the beetle. Page after page of glorious color illustrations show how beetles have evolved a range of astonishing shapes and colors, scarcely to be matched by any other living creature. The vivid patterns seen in Living Jewels will be a constant source of inspiration to professional designers and of visual wonder to the general reader.
