What am I? What is consciousness? What is the difference between past and future? Does the world presuppose a creator? Do we always act out of self-interest? This is a book about the big questions in life: knowledge, consciousness, fate, God, truth, goodness, justice. It is for anyone who believes there are big questions out there, but does not know how to approach them. Written by the author of the bestselling Oxford Dictionary of Philosophy, *Think* sets out to explain what they are and why they are important. Simon Blackburn begins by putting forward a convincing case for the study of philosophy and goes on to give the reader a sense of how the great historical figures such as Plato, Hume, Kant, and Descartes have approached its central themes. Each chapter explains a major issue, and gives the reader a self-contained guide through the problems that philosophers have studied. The large range of topics covered range from scepticism, the self, mind and body, and freedom to ethics and the arguments

surrounding the existence of God. Written in a lively and approachable manner, this book is ideal for all those who want to learn how the basic techniques of thinking shape our existence.

挺好的一本书，给分低是因为作为reading list上第一本，对我的essay居然没多大relevance...==

introduction就得这么写，从几大主题入手，不拘泥于个别哲学家。不像别的每次一上来就古希腊，能烦死个人。

年初放寒假之前从学校图书馆借回来，一直到疫情缓和开学后的一段时间才读完。
