Alfred Jarry (1873-1907) was the original transgressive author; the first word of his famous play Ubu Roi - "Shittr" - changed the course of art and drama forever. Jarry's novels are equally outrageous, and the best of them are now again available in English. Where Exploits and Opinions of Dr. Faustroll, Pataphysician is philosophical, The Supermale is carnal. Andre Marcueil, gentleman and scientist, has the ability to make love an infinite number of times in succession. Like a mock Jules Verne, Jarry describes the manner in which this Supermale proves his claim; after 82 times with a woman, attending doctors finally hook him up to a machine instead, with whom he merges in the book's - and the Supermale's - final climax. Barbara Wright's excellent translation, first published by New Directions, has been long out of print.
