Thirtysomethings Freya and Jack have been “just friends” for more than ten years. Of course, they’ve had their differences. Freya doesn’t approve of Jack’s taste for student teeny-boppers from Planet Bubblegum, and Jack has problems with Freya’s utter scorn for human frailty—especially his own.

So when Freya, dumped by her lawyer boyfriend, moves temporarily into Jack’s apartment, tensions simmer. They reach a boiling point when Jack agrees to act as Freya’s Significant Other at her step-sister’s society wedding. Now, old friends, best friends, just friends, are fighting like cats and dogs.

Bestselling author Robyn Sisman has written a sexy, hilarious novel about that eternal struggle to find “the one” –the one for now and the one forever!
