"Create Killer Websites Using the Power of Modern JavaScript" DHTML Utopia is an

easy-to-follow, step-by-step tutorial that will show you how to make your websites more slick, dynamic, and usable.

Add dynamic interactivity to your website with DHTML by combining the power of JavaScript, Cascading Style Sheets(CSS), and the Document Object Model (DOM) to achieve bulletproof, accessible, standards-compliant, and aesthetically pleasing results that work on all browsers. </p>

Build fancy DHTML effects that can be instantly reused in any project

Learn to code accessible JavaScript that won't trouble older browsers

Make search engine friendly, multi-level, drop-down navigation menus

Create usable forms that auto-complete, just like "Google Suggest"

Build dynamic web applications using remote scripting techniques/Ajax</p>
