Typography 23, the only annual devoted exclusively to typography, presents the finest work in this field for 2001. Selected from approximately 2,500 international submissions, the 158 winning designs displayed in this reference are models of

excellence and innovation in the use of type. Winners of this latest competition come from books, magazines, corporate identities, logotypes, stationery, annual reports, video and web graphics, and posters. Special indices list full information on the typefaces used, the creative team, and winners of Judges' Choice awards. Of course, each entry is displayed in vibrant color on premium paper.
