In this series, we take our audience to discover the relationship in another angle. That is to focus only on illustration and look at how illustration as a tool makes relationship between the designers and the audience. This book showcases the global trends of illustrations from around the world. As a bank of resources, we spotlight on the characteristic of the purpose of how visual impact is transferred through illustrations.

The theme in illustrations is often created as how the illustrators or designers would like to present themselves. Thus, the collection of the illustrations in this book is divided into 5 sections- Dream & Fantasy; Fun & Playful; Gloomy & Mystery; Structural & Complex; and Distinctive & Unique, to uncover the diversity of illustrations and the influence within. Through this book, we hope to strive our readers to distinguish themselves when they create, let their curiosity and imagination be free, imply their feelings to their stories and set out their own world of illustrations and designs.
