isbn:9780764539664

Java 2 Enterprise Edition (J2EE) is the specification bhat all enterprise Java developers need to build multi-tier applications, and also the basis for BEA's WebLogic Application Server and IBM's WebSphere. This title is revised to be current with the significant J2EE 1.4 update that will drive substantial developer interest. It is written by a top-selling

team of eleven experts who provide unique and substantial business examples in a vendor-neutral format, making the information applicable to various application servers. It covers patterns, J2EE application servers, frameworks, Ant, and continuous availability. It includes extensive intermediate and advanced coverage of J2EE APIs. The Companion Web site provides additional examples and information.
