评论

正在读harverd university press 1980年的英译版

Amazed at how much LC, with his all heart, believed what architecture and a 'grounded proportion' could benefit. In his words, there is a nearly arrogant sense of commitment to not only architecture but human civilization as well - a common spirit shared by architects of the time. Do we still have it now? Do we need it? Are we able to hold it?

书评

虽然是中国建筑工业出版社出版，但是中文版翻译十分让人困惑，但不能掩盖原著的光辉。本书系统的介绍了勒柯布西耶的创作方法和原则，写到了人体尺度，和本书主要阐述的“模度”。抛开翻译这部分，总体评价是一本好书。
