isbn:9780321159984

This book is a user guide for the Linux desktop, specifically geared toward the KDE desktop, and covering the most popular desktop tools. It covers getting on the Internet, e-mail, Web browsers, office applications (word processors, spreadsheets,

presentations -- primarily the OpenOffice.org suite), playing and ripping songs, burning CDs, watching movies, playing games, and so on. The author provides the perfect way to really check out and get under the hood of Linux by including a special bootable Linux CD (Knoppix) -- not one you install from, but rather one you can just boot and run without reinstalling.
