isbn:9780393731217

A guide to essential window design issues, technologies, and applications for

designers, specifiers, and builders. Designing facades and selecting windows in commercial buildings requires balancing many issues and criteria. This fact-packed handbook outlines the basics of glazing selection and provides critical information and performance data on the energy efficiency, interior environment, and technical considerations that drive window design decisions in commercial buildings. 50 b/w photographs, 200 b/w line drawings.
