Have the words you need when every word counts. In a medical emergency how well you communicate with your patients and their families can make the difference between life and death. An important resource for first responders, paramedics, and ER staff with little or no prior knowledge of Spanish, this powerful program arms you with the linguistic skills needed to provide your Spanish-speaking patients with the care they deserve. Convenient, flexible, and complete, "McGraw-Hill's Spanish for Emergency Care Providers" features: A Comprehensive Course Book - Using sample dialogues, numerous exercises, and more than 200 expert illustrations, the book introduces a vocabulary of 2,500 general and medical terms, builds familiarity with typical emergency care situations, and develops a greater awareness of Latino culture and its impact on healthcare issues. A bilingual glossary features 1,000 of the most useful medical Spanish terms for easy reference. Audio CDs - Featuring a variety of native speakers, the first two CDs contain vocabulary, phrases, and dialogues that reflect a wide range of common medical situations - everything from the first interview to medication instructions and follow-up - while the third zeros in on situations typically encountered by emergency care providers. An accompanying booklet contains the full scripts and English translations of the dialogues. Continuing Medical Education Tests for CME credit - The ten CME tests contained in this booklet have been approved for a maximum of thirty hours in category 1 credit toward the American Medical Association Physician's Recognition Award. Test accreditation is sponsored by the University of Arizona College of Medicine at the Arizona Health Sciences Center.
