著者:Klaassen

出版者:McGraw-Hill Professional

出版时间:2003-6

装帧:Pap

isbn:9780071389143

This title is based on the Gold Standard in the field! For over 25 years, "Casarett & Doull's Toxicology" has set the standard for providing thorough, academic, and authoritative information and remains the leading reference in the literature. Derived from this classic, "Casarett & Doull's Essentials of Toxicology" uses a highly readable,

extensively illustrated approach to provide an in-depth understanding of the principles of toxicology and how poisons affect the body. You'll learn about basic principles, toxicokinetics, how toxic effects are passed on to succeeding generations, how each body system responds to poisons, and the specific effects of a wide range of toxic agents - from pesticides to radiation. This title provides the benefits of the leading reference without the bulk. It is ideal for course work or as a concise reference. It presents concepts in logical progression from general principles to specific topics and examples. The chapter outlines overview study points and make review fast and easy by noting specific topics and examples. Simple, clear illustrations communicate complex concepts and reinforce comprehension. Summary tables distill important information. The key points sections summarize each chapter. Review questions assess your comprehension of content. End-of-chapter bibliographies facilitate further study or research.
