Mile-by-mile navigation coverage from Miami to Mobile in a convenient cockpit and pilothouse format. "The Intracoastal Waterway Chartbook" is a complete set of full-color navigation charts for the coastal waterway running from Miami to Mobile - over 780 miles - including charts for all the major inlets and coastal passages en route. As the Kettlewells have done with their best-selling "Intracoastal Waterway Chartbook: Norfolk, Virginia, to Miami, Florida", this compact, easy-to-use chartbook has been carefully assembled from NOAA chart segments (shot at same scale) to give you seamless coverage flowing from the bottom of one page to the top of the next. It also includes: useful chart-margin information such as statute miles and bridge locations; GPS waypoints on the charts; bridge and lock schedules; and marine facilities listings; distance tables; and a handy place-name index. Praise for "The Intracoastal Waterway Chartbook: Norfolk, Virginia, to Miami, Florida": 'All the charts you need for the 1,000-mile 'Ditch' cruise for a fraction of the price' - "Cruising World". 'An excellent compendium' - The Capital (Annapolis, MD). 'An outstanding example of economical, complete, no-nonsense chart compilation' - "Practical Sailor".
