"Clinical Procedures for Ocular Examination, Third Edition", is a must-have resource for students and practitioners involved in eye care. This concise handbook provides detailed, step-by-step procedures for performing each examination technique. Each technique is then described by purpose, indication, equipment, set-up, recording, and examples - all accompanied by updated graphics and photographs. The latest technologies and techniques in the field of vision care are covered in this comprehensive guide. It features: step-by-step procedures for each exam procedure; convenient summaries of practical how's and why's, without distracting theory; new procedures include corneal topography, pharmacological pupil testing, photostress test, and more; expanded tables, such as cranial nerve screening and refraction flow chart; and, updated references and norms.
