The book is the first of its kind and useful to students, teachers and practising colposcopists. The details of each instrument and content matter are highly informative. Apart from it, this work is highly beneficial for students of Gynecology. The figures are immensely colourful by nature. Emphasis has been placed on understanding the tissue basis of colposcopy, colposcopic terminology and grading

systems, the indications and technique of colposcopy and the recognition of various colposcopic patterns in the diagnosis of cervical neoplasia.
