出版者:McGraw-Hill

出版时间:2003-10

装帧:Paperback

isbn:9780071422123

This work teaches how to build your own robot for practical uses such as companionship, supervision of elderly, tutoring and doing household chores. It explores enabling technologies such as mobility, voice communication, touch, sight, and smell response. One full chapter covers how to build your own MentorBot from a

kit as well as separate parts.
