isbn: 9780071437158

This richly illustrated project book provides "fast-track" training for hobbyists and technicians wishing to build and design digital video equipment. Using an easy-to-learn 'building block' approach that starts with function blocks, then converts them to schematics, and finally design flowcharts, the book allows even novices to

build complex video devices. 12 complete projects are included and can be customized for use in the reader's own designs.
