This essential book for all software developers - regardless of platform, language, or type of application - outlines the "19 deadly sins" of software security and shows how to fix each one. Best-selling authors Michael Howard and David LeBlanc, who teach Microsoft employees how to secure code, have partnered with John Viega, the man

who uncovered the 19 deadly programming sins to write this much-needed book. The coverage includes: Windows, UNIX, Linux, and Mac OS X C, C++, C#, Java, PHP, Perl, and Visual Basic Web, small client, and smart-client applications.
