Wealth inequality, corporate welfare, and industrial pollution are like the fevers and chills of the economy. The underlying illness is shareholder primacy: the corporate drive to make profits for shareholders, no matter who pays the cost. It's a form of discrimination based on wealth. It's economic aristocracy. In *The Divine Right of Capital*, Marjorie Kelly shows that corporations are built on six aristocratic principles (only those who own property can vote, for example). That work in the interests of wealth-holders and against those of employees and the community. Most importantly, Kelly shows how to use democratic principles to build a new corporate order that serves the many rather than the few.
