出版者:McGraw-Hill/TAB Electronics

出版时间:2001-10-29

装帧:Paperback

isbn:9780071376839

Bring a robot to life without programming or assembly language skills!

There's never been a better time to explore the world of the nearly human. With the complete directions supplied by popular electronics author John Iovine, you can:

• Build your first walking, talking, sensing, thinking robot

• Create 12 working robotic projects, using the fully illustrated instructions provided

• Get the best available introduction to robotics, motion control, sensors, and neural intelligence

• Put together basic modules to build sophisticated ‘bots of your own design

• Construct a robotic arm that responds to your spoken commands

• Build a realistic, functional robotic hand

• Apply sensors to detect bumps, walls, inclines , and roads

• Give your robot expertise and neural intelligence

You get everything you need to create 12 exciting robotic projects using off-the-shelf products and workshop-built devices, including a complete parts list. Also ideal for anyone interested in electronic and motion control, this cult classic gives you the building blocks you need to go practically anywhere in robotics.
