A comprehensive reference guide that covers all the features, old and new, of PageMaker. New product features are highlighted with a "New to Version 7" icon, while design/product tips and techniques are included to expand the experienced-user appeal. A 16-page colour insert shows projects in process and shows how to use and

customize the hundreds of templates, stock illustrations, and photos included in PageMaker. Projects provided utilize the features and techniques presented in the chapters up to that point and help solidify the concepts presented.
