Do you have the stamina and strength to do physically demanding work? Are you willing to work at great heights, in small spaces, or outdoors? Do you like to help create large, intricate projects? Choosing a career may seem like a daunting task if only because of the countless possibilities available to skilled craftspeople. Inside, you'll find comprehensive information, such as up-to-date salary statistics and training requirements, on a range of careers that are in demand, including those in: building and construction; manufacturing; forestry and logging; and the petroleum industry utilities. "Engineering Careers for Hard Hats" presents information on a variety of satisfying professions that will help you construct the career that's right for you!
