Everything you need to know to capitalize on the hottest job sector ever! There's never been a better time to get an Internet-related job. The market for Webmasters, software engineers, and other computer talent is booming. What do these jobs require? Who has the best opportunities? How to find the most comfortable fit and highest pay? This

insider's guide knows and tells all. From the basics to the fine points, it delivers the information every new and experienced Internet job seeker needs: where the jobs are--the 50 top cities; what the jobs are--complete with job titles; top 100 Internet employers; data on salaries, stock options, work hours, dress code, unusual perks, and more; guidance on certifications; pros and cons of temp/contract work vs. staff positions, start-ups vs. established companies, and much more.
