

# Contemporary Artificial Intelligence

[Contemporary Artificial Intelligence\\_ 下载链接1](#)

著者:Richard E. Neapolitan

出版者:Chapman and Hall/CRC

出版时间:2012-8-25

装帧:Hardcover

isbn:9781439844694

作者介绍:

目录: Introduction to Artificial Intelligence  
History of Artificial Intelligence  
Contemporary Artificial Intelligence  
LOGICAL INTELLIGENCE  
Propositional Logic

Basics of Propositional Logic  
Resolution  
Artificial Intelligence Applications  
Discussion and Further Reading  
First-Order Logic  
Basics of First-Order Logic  
Artificial Intelligence Applications  
Discussion and Further Reading  
Certain Knowledge Representation  
Taxonomic Knowledge  
Frames  
Nonmonotonic Logic  
Discussion and Further Reading  
PROBABILISTIC INTELLIGENCE  
Probability  
Probability Basics  
Random Variables  
Meaning of Probability  
Random Variables in Applications  
Probability in the Wumpus World  
Uncertain Knowledge Representation  
Intuitive Introduction to Bayesian Networks  
Properties of Bayesian Networks  
Causal Networks as Bayesian Networks  
Inference in Bayesian Networks  
Networks with Continuous Variables  
Obtaining the Probabilities  
Large-Scale Application: Promedas  
Advanced Properties of Bayesian Network  
Entailed Conditional Independencies  
Faithfulness  
Markov Equivalence  
Markov Blankets and Boundaries  
Decision Analysis  
Decision Trees  
Influence Diagrams  
Modeling Risk Preferences  
Analyzing Risk Directly  
Good Decision versus Good Outcome  
Sensitivity Analysis  
Value of Information  
Discussion and Further Reading  
EMERGENT INTELLIGENCE  
Evolutionary Computation  
Genetics Review  
Genetic Algorithms  
Genetic Programming  
Discussion and Further Reading  
Swarm Intelligence  
Ant System  
Flocks  
Discussion and Further Reading  
LEARNING  
Learning Deterministic Models

Supervised Learning  
Regression  
Learning a Decision Tree  
Learning Probabilistic Model Parameters  
Learning a Single Parameter  
Learning Parameters in a Bayesian Network  
Learning Parameters with Missing Data  
Learning Probabilistic Model Structure  
Structure Learning Problem  
Score-Based Structure Learning  
Constraint-Based Structure Learning  
Application: MENTOR  
Software Packages for Learning  
Causal Learning  
Class Probability Trees  
Discussion and Further Reading  
More Learning  
Unsupervised Learning  
Reinforcement Learning  
Discussion and Further Reading  
LANGUAGE UNDERSTANDING  
Natural Language Understanding  
Parsing  
Semantic Interpretation  
Concept/Knowledge Interpretation  
Information Extraction  
Discussion and Further Reading  
Bibliography  
Index
