The biowarfare people call the bug a Level 4 pathogen. That means no cure. No hope. No survivors.

Now it's loose on Quantum Flight 66. One passenger is already dead. The experts say in 48 hours the rest may follow.

James Holland, former U.S. fighter pilot, now flying this commercial Boeing 747, isn't ready to die. They say he can't land his plane. They say he's a threat to the whole world. They're ready to blast him out of the sky.

Captain Holland may be on a collision course with doom-but they're going to have to catch him first. He's determined to take whatever risks he must to outfly them. Outsmart them. And beat...Pandora's Clock.
