Over the last two decades, photographer Greg Gorman has carved out a classically refined style that is uniquely his own. In his portraits of Streisand, DiCaprio, De Niro, and Travolta, his fine art work, and his major ad campaigns, Gorman's images suggest a mastery of the medium that few have rivaled. Continuing his exploration of the male nude, *Just Between Us* is a highly charged work focused exclusively on one model. During a year of shooting, an unusually collaborative relationship evolved between artist and subject. What unfolds is a photographic narrative unfettered by convention—a bold compilation of images unmatched for its candor and sexuality. 250 photographs are featured.
